CREATININE AND CALCULATED GLOMERULAR FILTRATION RATE

Collected on Jun 11, 2026 10:19 AM

Click to learn more

Results

Estimated Glomerular Filtration Rate

Normal value: >=60 mL/min/1.73 m2

Value
>60

Estimated GFR (eGFR) helps us know how the kidneys are working. eGFR is based on the creatinine blood test result, age, sex, and body size. Monitoring eGFR over time helps us understand changes in kidney function.

Actual kidney function may be better or worse than the estimated GFR because blood creatinine levels are affected by body make up, diet, hydration, genetics, and more.

Multiple eGFR values are used to determine chronic kidney disease (CKD) stages, defined by the following ranges:

eGFR 45 - 59 = Stage 3a
eGFR 30 - 44 = Stage 3b
eGFR 15 - 29 = Stage 4
eGFR under 15 = Stage 5

Values for eGFR before 05/25/2022 will appear in lab results under "Past results".

Creatinine

Normal value: <=1.34 mg/dL

Value
1.10

Authorizing provider: NIKHIL NEELKANTAN MD

Collection date: Jun 11, 2026 10:19 AM
Result date: Jun 12, 2026 1:56 AM
Result status: Final

Result status: Final
